

FIFTY-THIRD ANNUAL REPORT
OF THE
BOARD OF SUPERINTENDENCE
OF THE
DUBLIN HOSPITALS,
WITH
APPENDICES FOR THE YEAR 1910-11.

TO HIS EXCELLENCY THE RIGHT HON. JOHN
CAMPBELL, EARL OF ABERDEEN, G.C.M.G.,
Lord Lieutenant General and General Governor of Ireland.

35 DAWSON STREET,

MAY IT PLEASE YOUR EXCELLENCY :

We, the Board of Superintendence of the City of Dublin Hospitals, have the honour to submit to Your Excellency this our Fifty-third Annual Report under Statute 19 & 20 Vict., cap. 110, passed on the 29th July, 1856, entitled *Dublin Hospitals Regulation Act*.

During the year ending 31st March, 1911, we have inspected all the Hospitals which receive grants from Parliament.

Viz. :—

1. Westmoreland Lock Hospital.
2. Stevens's Hospital.
3. Meath Hospital and County Dublin Infirmary.
4. Cork Street Fever Hospital.
5. The Houses of Industry Hospitals, *viz. :—*
 - a. Hardwicke Fever Hospital.
 - b. Whitworth Medical Hospital.
 - c. Richmond Surgical Hospital.
6. Rotunda Lying-in Hospital.
7. Coombe Lying-in Hospital.
8. The Royal Victoria Eye and Ear Hospital; and
9. Royal Hospital for Incurables, which receives a portion of the Concordatum Fund.

On these occasions we carefully observed and inquired into the state and condition of each institution to ascertain that the wards were clean and well ventilated, that every provision was made for the treatment, comfort, and welfare of the patients, and that the several buildings were kept in good repair and in a sanitary condition. We made inquiries respecting the current expenses of

each hospital and the system of purchasing, storing, cooking, and issuing supplies; we looked into the nursing arrangements, and into the means available in each hospital for the extinction of an outbreak of fire, and for the escape of the inmates in the event of such an occurrence, and, in fact, into all such matters as might assist us in supervising these hospitals, and in reporting thereon in accordance with the provisions of the 18th section of the Act of 19 and 20 Victoria, cap. 110.

In the Appendix we set forth two sets of tables. One set tells of the work done—viz., the number and the nature of cases treated in each hospital during the year, the average number of beds occupied, the average time spent under treatment by each patient, the number of deaths. The other set has reference to the economic side of the question. Table No. 1 shows for each hospital its income and the sources thereof. No. 2 the average cost per bed for maintenance and for establishment and for both combined, but exclusive of buildings and furniture. No. 3 sets forth in detail the chief heads of expenditure. No. 4 the prices for each article supplied to each hospital per contract or otherwise. There is also appended a form giving the names of the governors of each hospital and the number of their attendances during the year.

A study of these tables, taken in conjunction with what we ourselves have observed, enables us to report that the hospitals under the superintendence of this Board fulfil in an economical and thorough way the objects for which they were instituted.

The only matter general to the hospitals under our superintendence, not referred to in previous reports, and now calling for remark, is the probable effect on charitable hospitals of the Bill for Insurance against sickness and invalidity at present before Parliament. Hitherto the public have looked on the labouring man disabled for work as a fit object for charity. They have subscribed and left legacies to hospitals because it was known that through the wards of the hospital and the special dispensaries attached to them lay the smoothest, shortest, and most economical road to recovery. It is unlikely, should the State arrange for the care of the labouring classes when incapacitated by sickness, that the charitably inclined will continue to subscribe to the same extent. Now, there is no doubt that for the maintenance of hospitals the system of voluntary aid, supplemented by State aid, yields the best and most economical results. By it the services of men of the highest standing are put within easy reach of the poor, both in the wards and in the dispensaries. We think this system is in danger, and that if it is once allowed to collapse it may not be possible to reconstitute it. This would be a serious thing for the poor, a serious thing for the progress of science, a serious thing for the tax-payer, the training of gentlemen for medical service. The practice of medicine is advancing by specialisation. Each class of disease has its department in a hospital. It is not too much to say that a club doctor, responsible for the health of a large number of work-people, will, in a great majority of the cases, have to call on the hospitals or their dispensaries for help. On what terms

will this be given? If the voluntary aid system is abolished it must mean a suitable remuneration for all medical service. We are of opinion that a system on such a foundation would not work as well or as economically as does the present one.

CORK STREET FEVER HOSPITAL.

A very large amount of work has been thrown by serious epidemics on this institution during the year, and it has been found equal to it. It is standing evidence of what good and economical work a charitable institution, helped by State or Municipal aid, can do. A most full and searching inspection caused us to leave fully satisfied with the way things are being conducted. We found that some suggestions we made last year have been carried out, and that the following improvements have been made:—The colonnade walls have been done in Parian cement; the Observation Wards in the Recovery House have been painted, and increased sanitary fittings have also been put into the House; also a door has been opened on the stairs, so that the wards are more completely under the nurses' supervision. A new Dining-room for the nurses has been opened, which removes the necessity of their crossing over to the Home for meals in wet weather. The wards in the Fever House have been cleaned and painted, and the lavatory accommodation in the Epidemic House has been completed. Bells have been fitted in the Observation Wards of the Fever House, so that the patients can summon the nurse if necessary.

ROYAL VICTORIA EYE AND EAR HOSPITAL.

We found this institution doing an enormous amount of work in an admirable fashion. It was a pleasure to inspect it. Every detail claimed commendation. On the 23rd January, 1911, the new Out-patient Department building was opened for patients. We fully endorse the following estimation of it, which appears in the report of the hospital:—

"It is admirably fitted to fulfil the intention for which it was designed; affording as it does perfect accommodation for the comfort of the patients, and every means for the cure of their ailments. We, indeed, believe it to be the finest Out-patient building of its kind in the Kingdom, and yet none too good for the work which has to be done in it."

	Eyes	Ears	Throats
No. of Extern cases treated	7,222	2,558	357 = 10,137
No. of visits paid in each class	27,189	9,604	1,845 = 38,638

The hospital is £2,964 in debt, with securities only to the cash value of £472.

THE MEATH HOSPITAL.

We found this Hospital doing excellent work under great financial difficulties. It was everywhere clean and in good order.

The wards, as regards space, ventilation, light, and warmth, are all that can be desired. The general sanitary arrangements are modern, and are well looked after.

We found the dinners just cooked. To taste they were excellent. The hospital being in debt, the management as to economy claimed our attention. In this respect it will bear comparison with any hospital. Neither has there been undue expenditure on building. Subscriptions and legacies alone seem wanting.

THE COOMBE LYING-IN HOSPITAL.

After an exhaustive inspection of this hospital there was a unanimous expression of satisfaction with every detail. During the year ended 31st March, 1911, this hospital has been enabled to complete the erection of the new Out-patient Dispensary, which has been built as a memorial to Gertrude, Countess of Pembroke, the trustees of whose fund granted the sum of £1,000 for this purpose. The building has been erected on the site formerly occupied by old derelict sheds, which were acquired by the hospital, and is facing the hospital on the southern end of the quadrangle, having a public entrance from Brabazon Street. The whole of the Maternity Wing, as also the entire outside of the hospital, has been repainted, thanks to the generosity of Mr. Wellington Darley, who provided a sum of nearly £900 to defray the cost.

Improvements have also been effected in the hot water arrangements, whereby a more satisfactory supply can now be maintained. Attendances of out-patients, 10,776.

DR. STEEVENS' HOSPITAL.

We inspected this hospital fully, and are satisfied with its condition. The building is kept in excellent repair, and, considering its age, is remarkably bright inside. As an institution it not only holds its own but is advancing. We noted that an open-air ward has been erected on the south side. Although it was a cold winter's day when we inspected it, the patients of this ward, on being asked, "Would they prefer to be inside?" unanimously declared for the open air. Other additions are a new pathological laboratory and an electric lift.

Accidents attended to	-	-	-	-	4,534
Patients attended to in General Dispensary	-	-	-	-	5,079

					<hr/> 13,687

A charge of 3s. is made for medicine supplied to out-patients.

THE RICHMOND, WHITWORTH, AND HARDWICKE HOSPITALS.

The authorities of this institution have good reason to be congratulated. The buildings of the Richmond speak for themselves, they are new, and they are kept looking so; but the Whitworth and Hardwicke show that the management can also make the best of old structures.

We are of opinion that the out-patient department requires reconstruction on modern principles. We are informed that by the falling out of an old lease, the Fever Nurses' Home on the grounds of the Hardwicke Hospital has gone out of the possession of the Governors within the past three months. This will necessitate the provision of new accommodation for nurses. The resources of the hospitals, the annual Parliamentary grant, will be seriously taxed for some years in order to provide a Fever Nurses' Home in place of the former one, and an out-patient department in keeping with the needs of the hospitals.

Attendances at General Dispensaries during the year :—

General	-	-	-	8,300	
Dressing	-	-	-	18,300

Throat and Nose	-	-	-	3,719	
Diseases of Women				752	
					7,258
Grand Total	-				37,918

THE ROTUNDA LYING-IN HOSPITAL.

Everything was found in excellent working order. As we moved from one part of the house to another there was nothing to express but satisfaction and congratulations to the patients, the students, the nurses, the probationers, to the Registrar, whose books were in excellent order, and to Dr. Henry Jellett, who has succeeded Dr. Tweedy as Master of this important and well-conducted institution.

WESTMORELAND LOCK HOSPITAL.

In our opinion the management of this hospital is satisfactory. Everything is neat, clean, and in excellent working order. It pleased us to note that so old a building and appointments could be made to look so well. We thoroughly inspected the food, the clothing, the bedding; in fact, everything. We entered into conversation with the patients in each ward and with the attendants, and we came away thoroughly satisfied.

ROYAL HOSPITAL FOR INCURABLES.

" Beautifully kept, well managed, patients seem most comfortable, happy, and satisfied with their surroundings." Such-like remarks indicate our feelings as we inspected this admirable institution. We have on so many occasions referred to the good work it does, it is unnecessary to say more now than that it still goes on its beneficent way cheerfully and unchecked.

We have the honour to be

Your Excellency's obedient, faithful servants,

JOHN E. BARRY, *Knt.*, *Chairman*.

DUBLIN CASTLE,

22nd July, 1911.

Sir,

I have to acknowledge the receipt of your letter of the 17th instant, forwarding, for submission to His Excellency the Lord Lieutenant, copies of the Fifty-third Annual Report of the Board of Superintendence of the Dublin Hospitals.

I am, Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The SECRETARY.

Dublin Hospitals Board.
